

RECYCLE LIKE A GATOR!!

BENEFITS OF RECYCLING

- Our landfills are overflowing, and we want to reduce the amount of plastic going there!
- Recycling plastic can reduce litter, prevent harmful emissions, and conserve natural resources

DEPOSIT RETURN SCHEMES

- Insert PET and HDPE bottles in kiosks at designated locations
- These plastic types will have the number 1 or 2 on the container

DUAL-STREAM BINS

- Two bins; one for plastic, one for paper products
- By separating your recyclables, you are reducing contamination, and allowing more recycling to occur!

EDUCATION

- Don't ask for straws! Bring your own grocery bags! Reuse, reuse, reuse!
- Attend workshops to hear about recycling!
- Visit your town hall to tell us how we're doing!
